

--In the preferred embodiment, the method of folding and storing the second layer 20 within the cavity 12 of the first layer 10, comprises generally the steps of diagonally folding the second layer 20 and inserting the folded second layer 20 within the cavity 12 of the first layer 10.

IN THE CLAIMS:

✓ Please cancel Claims 5 - 6.

Please amend Claims 1 - 4 as follows:

1. (Amended) An assembly, that is a bag/bed assembly comprising:

Sub
C2
A

a first layer (10) having a first side (10A), a second side (10B), and a cavity (12) formed on the inner side of the first layer (10), the first side (10A) having a first edge (13A) and the second side (10B) having a second edge (13B), wherein the first edge (13A) and the second edge (13B) defining a closure (13), and said first edge (13A) and the second edge (13B) further defining an access opening (13C) to the cavity (12);

a second layer (20) having a rectangular configuration that includes a first corner (20A) and a second corner (20B) defining the width of the second layer (20), and a third corner (20C) and a fourth corner (20D) defining the length of the second layer (20);

a third layer (30) contained within the second layer (20);

a fastening means (40) having a first fastening member (40A) and a second fastening member (40B), wherein said second fastening member (40B) is transversely positioned along the inner side of the second edge (13B), and said first fastening member (40A) positioned on the outer side of the first edge (13A); and

wherein the first side (10A) and the second side (10B) of the first layer (10) is wrapped around the second layer (20) for storage thereof.

2. (Amended) The assembly as recited in Claim 1, wherein said cavity (12) further defines a storage means.

A' 3. (Amended) The assembly as recited in Claim 1, wherein the third layer (30) is formed from a foam-type material.

4. (Amended) The assembly as recited in Claim 1, wherein the first layer (10) and the second layer (20) is formed from a cloth material.

Please add Claims 7 - 10 as follows:

Sub C2 7. A bag/bed assembly comprising:
a first layer (10) having a first side (10A), a second side (10B), and a cavity (12) formed on the inner side of the first layer (10), the first side (10A) having a first edge (13A) and the second side (10B) having a second edge (13B), wherein the first edge (13A) and the second edge (13B) defining an access opening (13C) to the cavity (12);
a second layer (20);
a third layer (30) contained within the second layer (20);
fastening means (40) for attaching the first side (10A) to the second side (10B); and
wherein the first side (10A) and the second side (10B) of the first layer (10) is wrapped around the second layer (20) for storage thereof.

A2 8. The assembly as recited in Claim 7, wherein said cavity (12) further defines a storage means.

9. The assembly as recited in Claim 7, wherein the third layer (30) is formed from a foam-type material.

10. The assembly as recited in Claim 7, wherein the first layer (10) and the second layer (20) is formed from a cloth material.
